

# How to Measure Your Ring Size

## Using a Ring You Already Own & Our Printable Chart

1. Print this chart at **100% scale** (no resizing). You can confirm accuracy by checking the card outline at the bottom — it should match the size of a standard **debit or credit card**.
2. Take a **ring** that already fits you or the person you're buying for, and place it over the **circles** on the right.
3. Match the **inside edge** of the **ring** to the **circle** that fits it best. Each circle shows the **internal diameter** in **millimeters (mm)** along with the ring size.
4. If the ring falls between **two sizes**, it's best to choose the **larger size** for a more comfortable fit.

If the height of a credit card (54mm) fits inside this outline, your print scale is correct.
